

**Rebate Amount
\$99,224.90**

**Annual Energy
Savings
\$49,000**

**Power 66
Homes For
One Year**

A Food Industry customer in St. Louis needed an air end repair on an old compressor. Brabazon recommended an air audit to identify any operating cost savings. The audit identified several strategies that would provide significant energy savings for their plant as well as stabilize plant air pressure to maximize production and minimize downtime.

Brabazon provided the customer with two new 150HP VSD compressors and a complete turnkey installation. We were able to lower the plant operating pressure by 10 psig which generated 34,239 kWh savings alone.

Working with the Ameren Missouri Program, the customer received a rebate of \$99,224.90 and kWh savings of 719,021 kWh which is an annual savings of \$49,000. These savings could power 66 homes for a year.

Brabazon Pump, Compressor & Vacuum has been the leading Midwest distributor of industrial fluid and gas products since 1978. We provide our customers with reliable and efficient service and equipment by being passionate about what we do. We have a long-standing track record of successfully minimizing our customers' operating costs utilizing innovation and technology.
