

**Annual Energy
Savings
\$28,000**

**\$29,670
Rebate**

**Power
37 Homes
For 1 Year**

Our customer in Southern Illinois, is the leading producer of innovative automotive lighting systems in North America. They came to Brabazon with issues controlling their multitude of air compressors and having them run effectively. They have two compressor rooms on either side of their plant with a total of five compressors.

Brabazon installed a monitoring system that would maximize efficiency by turning on and off compressors to match their fluctuating demand. In addition, we are able to monitor their system remotely and alert them of any issues to maximize their uptime.

Ameren awarded them a rebate of \$29,670 for a kWh savings of 404,228, which is an annual savings of \$28,000. The electricity saved could power 37 homes for one year.

Brabazon Pump, Compressor & Vacuum has been a Midwest distributor of industrial products since 1978. We provide our customers with quality service and equipment by being passionate about what we do, having long-standing track record of success, and utilizing innovation and technology.
